improving JRU SWIT

Current Problem

What Students See

Students can view their grades for each term in JRU SWIT.

The displayed grade may not show the detailed scores behind the final result.

Student Concern

Students may wonder how a grade was computed.

Some may feel shy or uncomfortable asking their professor for a full computation

Possible Record Issues

A quiz, activity, exam, or other requirement may be missing or not recorded.

Students may not notice this if they only see the final grade.

Proposed Improvement

Detailed Grade Breakdown

Add a section where students can see the scores used to compute their grade.

Students can check whether each requirement was recorded.

The feature gives clearer information before a student asks for clarification.

Information to Show

- Quiz scores
- Activity scores
- Exam scores
- Projects / performance tasks
- Missing or unrecorded requirements
- Percentage or weight of each requirement
- Final grade computation

Study Goal & Information Needed

Main goal: Make grade information clearer and easier for students to understand.

Do students understand how their grades are computed? Have students experienced missing or unrecorded scores?

Do students feel comfortable asking professors about grade concerns?

What grade information do students want to see?

Would a detailed grade breakdown be useful?

Data Gathering Methods

1. Interview

Talk to 10 students.

Ask about their experience when checking grades and their concerns.

2. Questionnaire

Use short multiple-choice, rating, Yes/No, and open-ended questions.

Compare the answers of different students.

3. Observation

Observe students while they locate and check their grades.

Record what information they can and cannot find.

Interview plan

Type	Participants	Time	Record
Semi-structured interview	10 students	10-15 minutes each	Written notes

- **How often do you check your grades on JRU SWIT?**
- **Is the current grade information enough for you? Why?**
- **Have you ever wondered how one of your grades was computed?**
- **Have you experienced a missing or unrecorded requirement?**
- **Do you ask your professor when you have grade concerns? Why or why not?**
- **Would you like to see individual scores and grade computation in SWIT?**
- **What other information would you like to see?**

Questionnaire Plan

Sample Questions

Do you clearly understand how your grades are computed? Yes / Sometimes / No

Have you ever wanted to know why you received a certain grade? Yes / No

Have you been concerned about a missing or unrecorded score? Yes / No / Not sure

Would you like SWIT to show individual scores? Yes / Maybe / No

How useful would a grade breakdown feature be? Very useful → Not useful at all

Information Students Can Select

- Quiz scores
- Activity scores
- Exam scores
- Project / performance task scores
- Missing requirements
- Percentage / weight
- Grade computation

Open-ended: What other improvement would you suggest?

Observation Section

Completed using the available questionnaire evidence; no direct observation data was provided

WHAT THE AVAILABLE DATA SHOWS

The survey suggests that students can access the grade section, but some still need more information after seeing a grade. 90% have wanted to know why they received a certain grade, while only 40% said they clearly understand grade computation. 70% have also worried about a missing or unrecorded requirement.

INTERPRETATION FOR THE DESIGN

These answers indicate that the main issue is not only finding the grade. Students also need to see the details behind it. The proposed grade breakdown should therefore show individual scores, weights, missing requirements, and the computation used to reach the grade.

Note: this is survey-based evidence, not a claim that a direct observation was conducted.

Combined Interpretation

Survey-led synthesis for the proposed SWIT improvement

NEED FOR EXPLANATION

90% have wanted to know why they received a certain grade.

NEED FOR VERIFICATION

70% have worried about a missing or unrecorded requirement.

SUPPORT FOR THE FEATURE

90% want individual scores shown; the remaining 10% answered "Maybe."

OVERALL MEANING

Together, the questionnaire results support a grade view that explains the grade instead of showing only the final result. The strongest requested details are project/performance scores, quiz/activity/exam scores, grading weights, missing requirements, and complete computation.

Informed Consent & Privacy

Decision: informed consent is required

WHY CONSENT IS NEEDED

Our study involves asking students questions and observing them while they use JRU SWIT. Before participation, we will explain the purpose of the study and ask for permission. Participation is voluntary, and participants may stop at any time.

PRIVACY RULES

We will not collect passwords, student numbers, or other sensitive information. Personal information will not be shown in the presentation. Audio will only be recorded if the participant agrees.

Consent statement: “I understand the purpose of the study and voluntarily agree to participate.”

Before the Actual Data Gathering

We will test the interview, questionnaire, and observation process with one student or group member.

We will check if:

- The interview questions are easy to understand.
- The questionnaire choices are clear.
- The observation instructions are easy to follow.
- Any questions are confusing or repetitive.

We will revise the materials if needed before the actual study.

Questionnaire Findings

Actual results from 10 student respondents • Questions 1–10

NEED FOR EXPLANATION

9 out of 10 respondents want SWIT to show individual scores for quizzes, activities, exams, projects, and other requirements. The remaining 10% answered “Maybe.”

90% WANTED MORE EXPLANATION

9 out of 10 respondents have wanted to know why they received a certain grade.

70% HAD MISSING-SCORE CONCERNS

7 out of 10 respondents have worried that an activity, quiz, exam, or other requirement was missing or not recorded.

UNDERSTANDING COMPUTATION

40% clearly understand how grades are computed, 40% understand only sometimes, and 20% do not understand based on the information available.

ASKING PROFESSORS

40% usually ask their professor about grade concerns, 20% ask sometimes, and 40% do not. Feeling shy was the most selected reason for not asking (40%).

MOST REQUESTED DETAILS

Project/performance scores: 100%. Quiz, activity, exam scores and grading weights: 90% each. Missing requirements and complete computation: 80% each.

Proposed Grade Breakdown Mockup

Course Summary

Projects	—	15%

Computed Grade: 90

Detailed Grade Breakdown

Detailed Grade Breakdown

Reflection

Based on the questionnaire data gathered from 10 respondents

WHAT WE LEARNED

The data gathering showed that students do not only want to see a grade; many also want to understand where it came from. The results helped us identify which information should be prioritized in the proposed feature. We also learned that some students hesitate to ask professors about grade concerns, so clearer information in SWIT may help them check details first.

WHAT WE WOULD DO DIFFERENTLY

For a stronger future study, we would gather responses from more year levels and conduct direct observation with students while they check their grades. We would also collect complete results for every questionnaire item and compare the findings across all three data-gathering methods.

Current Conclusion

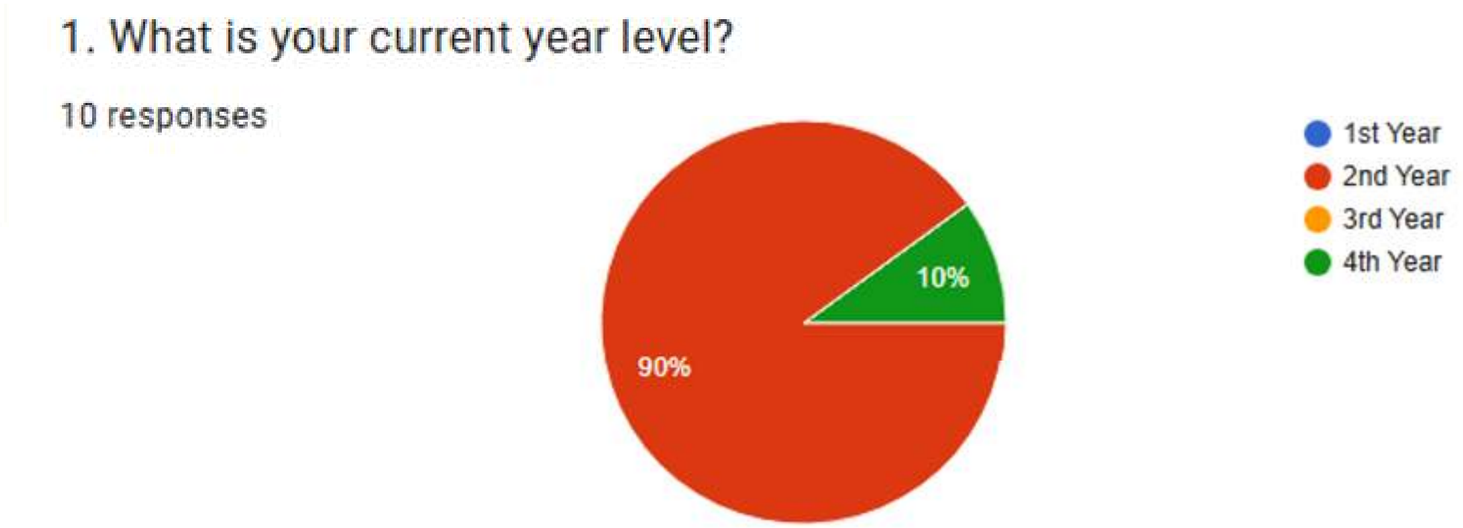

What the questionnaire supports at this stage

The questionnaire results support continuing the proposed Detailed Grade Breakdown feature. Among the 10 respondents, 90% want individual scores displayed, and 70% have experienced concern about a missing or unrecorded requirement. The proposed feature should prioritize project/performance scores, quizzes, activities, exams, grading weights, missing requirements, and grade computation.

This conclusion is preliminary. The final conclusion will combine questionnaire, interview, and observation findings.

What is your current year level?

Question 1: Survey Result

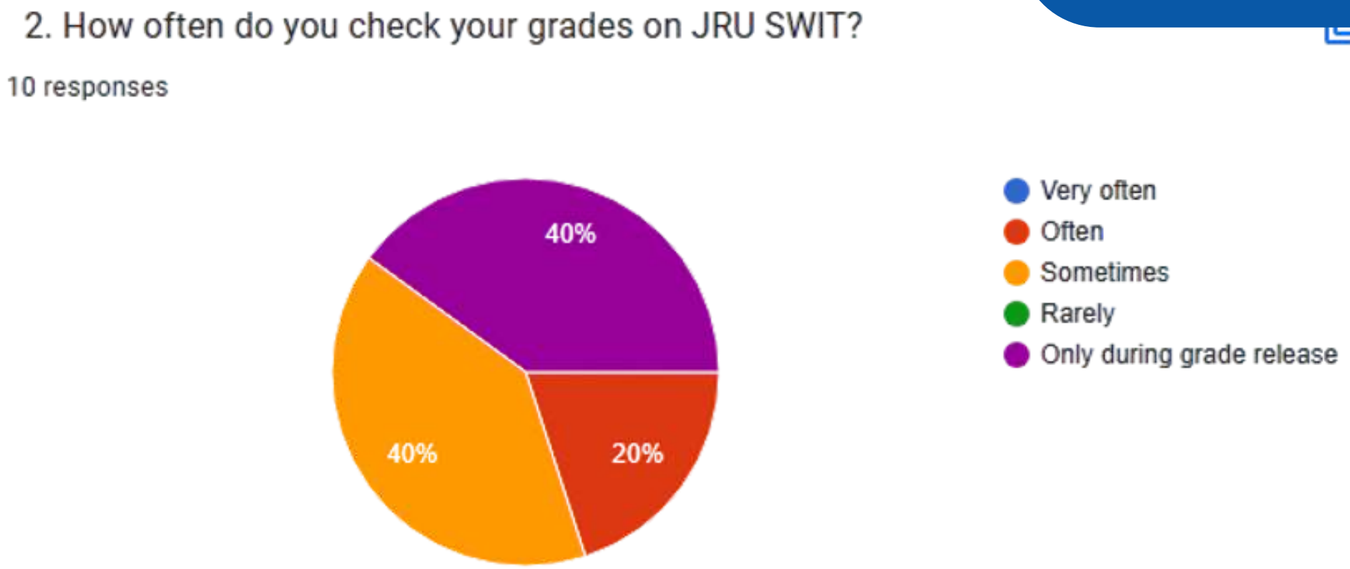

Explanation

Among the 10 respondents, 90% are 2nd Year students and 10% are 4th Year students. The results therefore mainly represent the experience of the 2nd Year respondents in this small sample.

How often do you check your grades on JRU SWIT?

Question 2: Survey Result

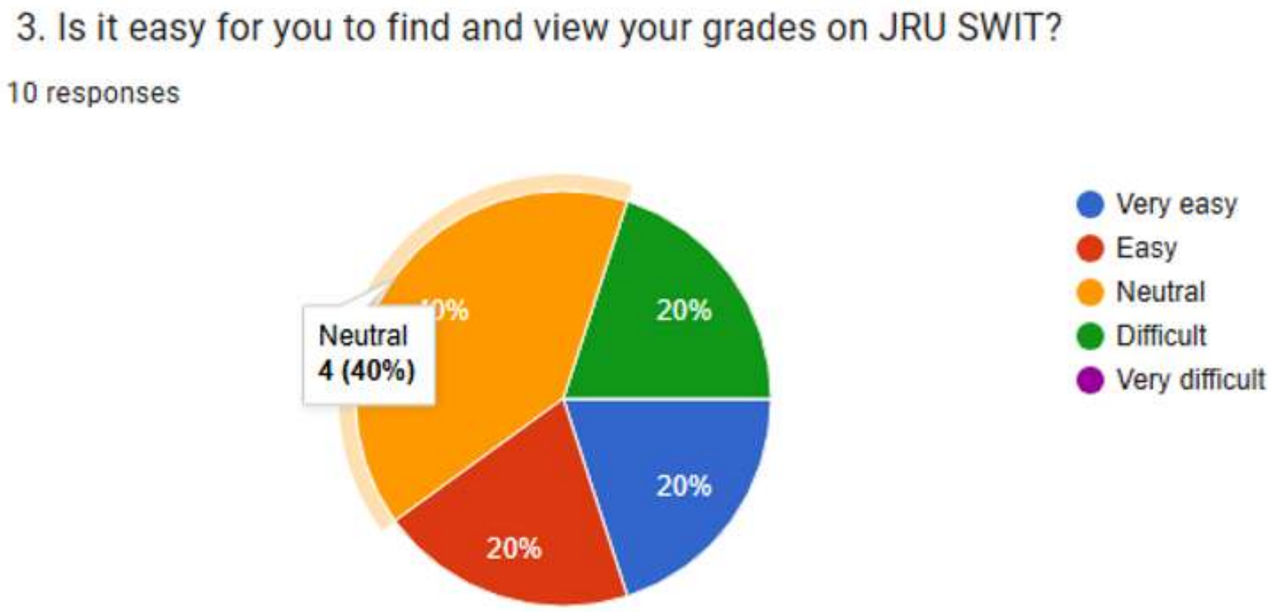

Explanation

40% check grades sometimes, 40% check only during grade release, and 20% check often. This shows that students use the grade section at different times, with many checking it mainly when grades are released.

Is it easy for you to find and view your grades on JRU SWIT?

Question 3: Survey Result

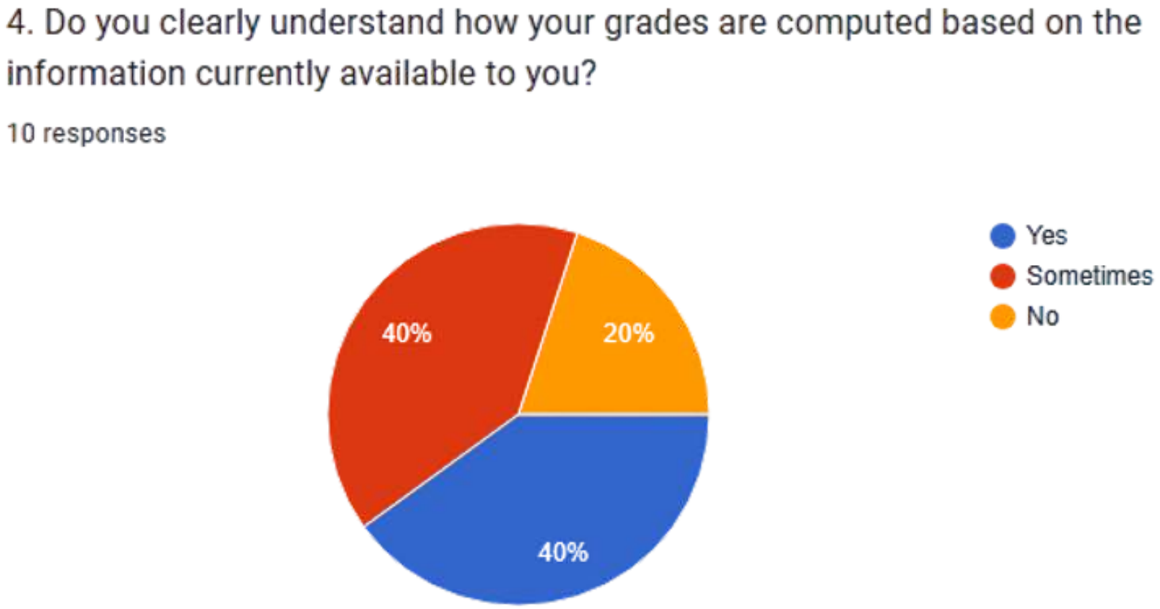

Explanation

40% answered Neutral, 20% Very easy, 20% Easy, and 20% Difficult. Most respondents did not report a serious problem finding grades, but the experience is not equally easy for everyone.

Do you clearly understand how your grades are computed based on the information currently available to you?

Question 4: Survey Result

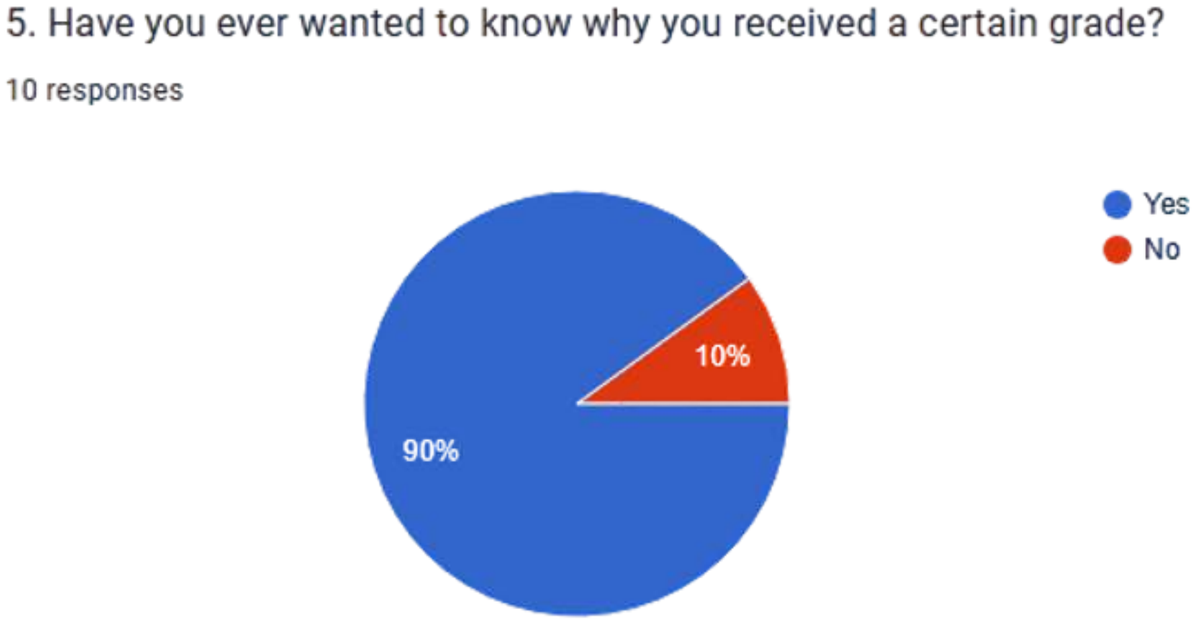

Explanation

Only 40% said they clearly understand how their grades are computed. Another 40% answered Sometimes and 20% answered No. This supports the need for clearer grade computation details.

Have you ever wanted to know why you received a certain grade?

Question 5: Survey Result

Explanation

90% have wanted to know why they received a certain grade. This is one of the clearest signs that students want more explanation behind the grade shown in SWIT.

Have you ever been concerned that an activity, quiz, exam, or other requirement was missing or not recorded?

Question 6: Survey Result

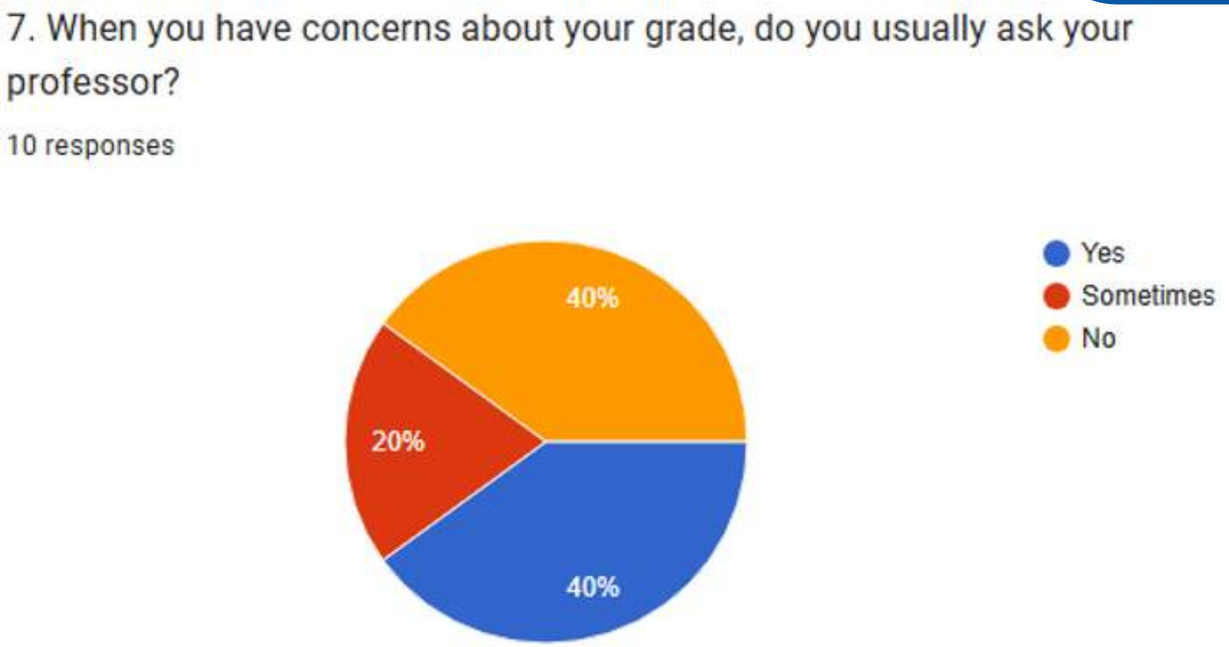

Explanation

70% have been concerned that an activity, quiz, exam, or other requirement was missing or not recorded. 10% were unsure, and 20% answered “No”. A detailed breakdown could help students notice these concerns earlier.

When you have concerns about your grade, do you usually ask your professor?

Question 7: Survey Result

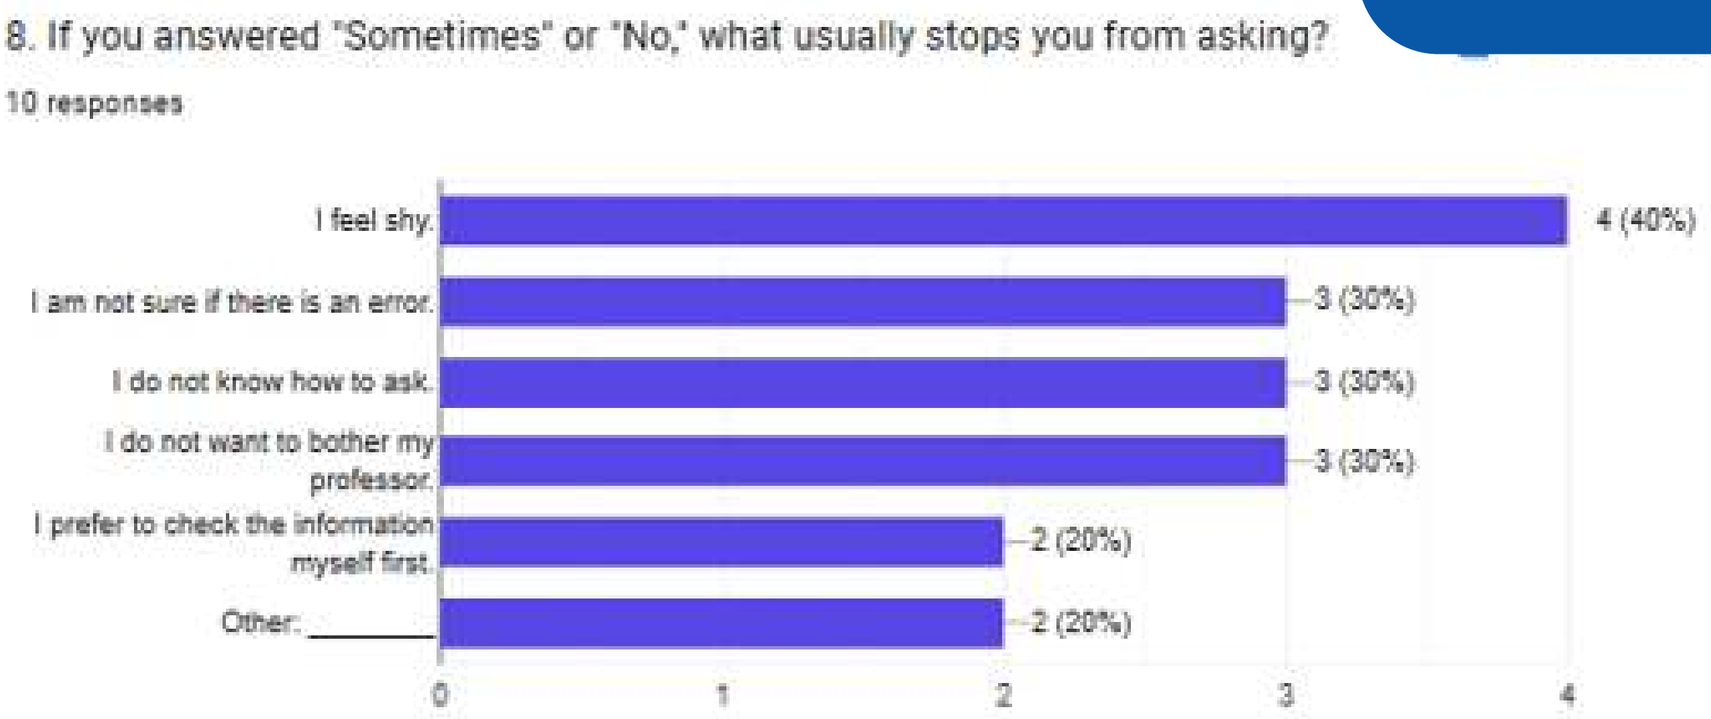

Explanation

40% usually ask their professor, 20% ask sometimes, and 40% do not ask. This means not every student directly asks for clarification when they have a grade concern.

If you answered "Sometimes" or "No," what usually stops you from asking?

Question 8: Survey Result

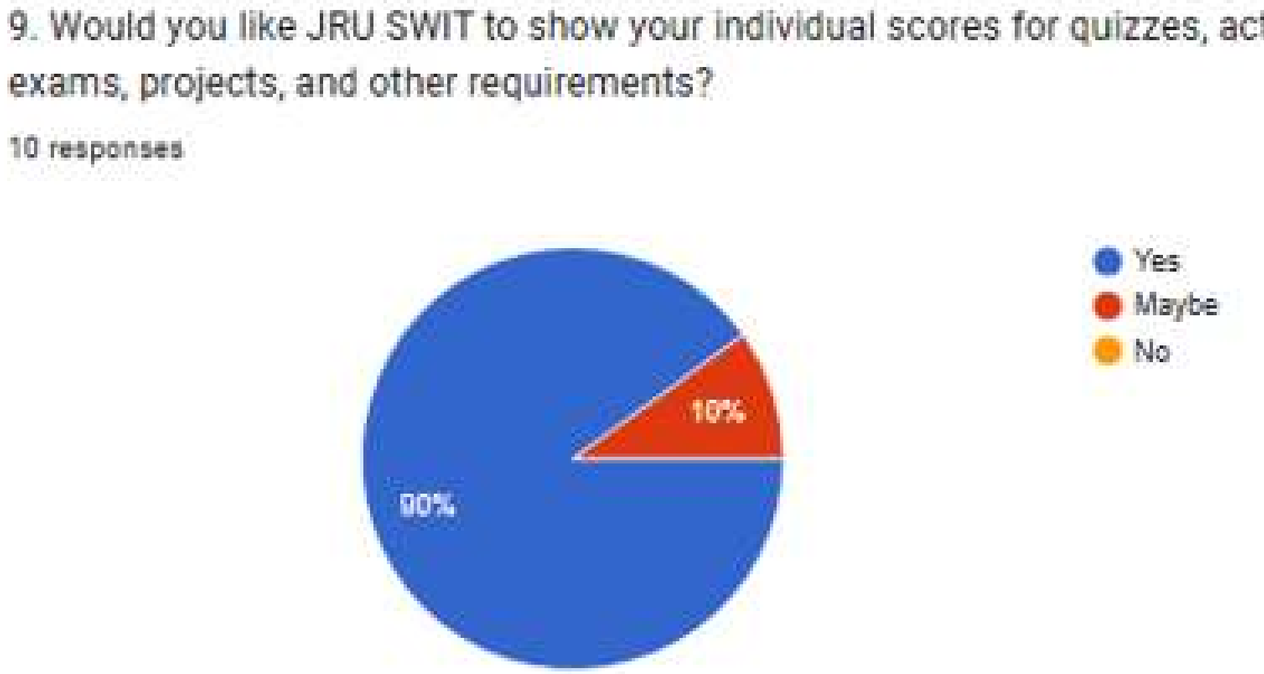

Explanation

The most selected reason was feeling shy (40%). Being unsure if there is an error, not knowing how to ask, and not wanting to bother the professor were each selected by 30%. Respondents could select more than one reason.

Would you like JRU SWIT to show your individual scores for quizzes, activities, exams, projects, and other requirements?

Question 9: Survey Result

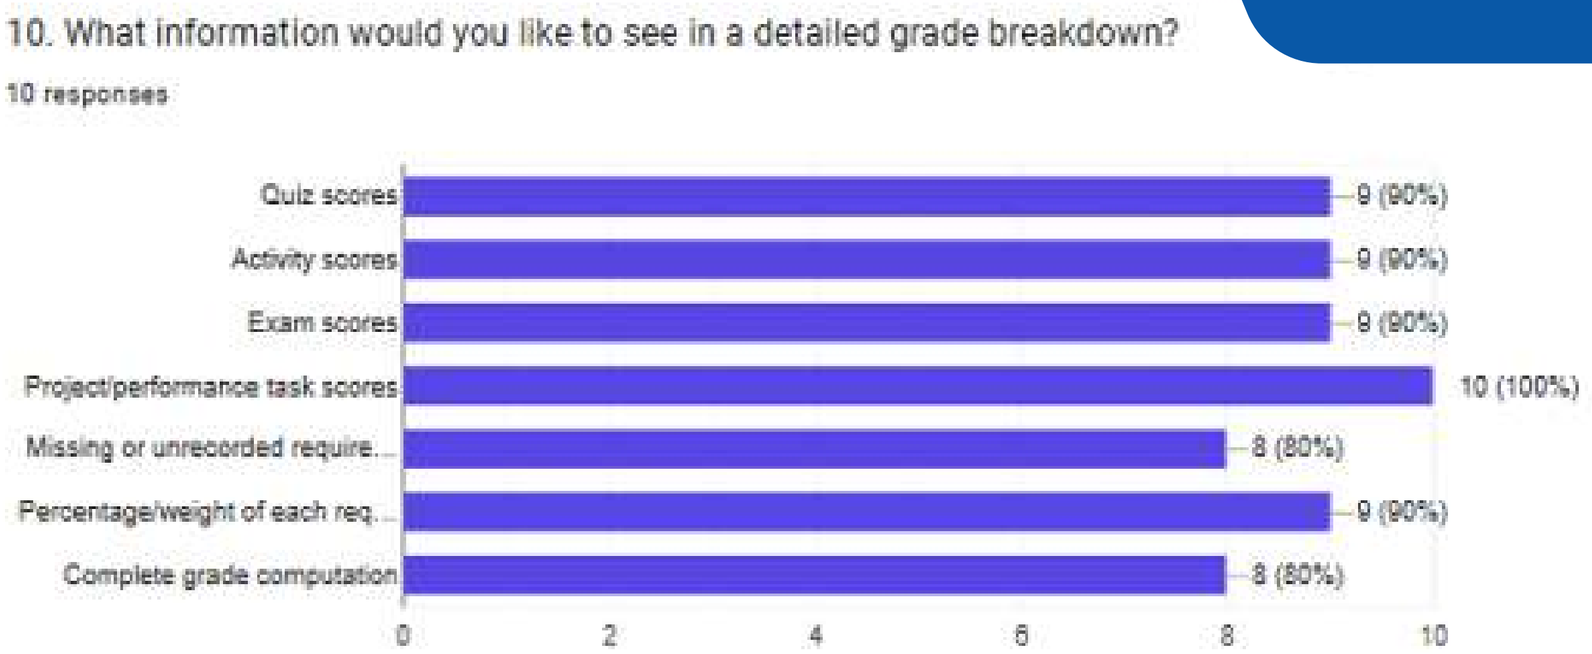

Explanation

90% answered Yes and 10% answered Maybe. No respondent answered No. The result shows strong support within this sample for showing individual scores in SWIT.

What information would you like to see in a detailed grade breakdown?

Question 10: Survey Result

Explanation

Project/performance task scores were selected by 100%. Quiz, activity, exam scores, and percentage/weight were selected by 90%. Missing/unrecorded requirements and complete grade computation were selected by 80%.

How useful would a Detailed Grade Breakdown feature be for you?

Question 11: Survey Result

Explanation/Result

The question used a 1–5 scale: 1 Not useful at all, 2 Slightly useful, 3 Moderately useful, 4 Very useful, and 5 Extremely useful. The result screenshot for this question was not included in the materials sent, so no percentage is invented here.

Do you think seeing a detailed breakdown would help you understand your grades better?

Question 12: Survey Result

Explanation/Result

This question checks whether students believe a detailed breakdown would improve their understanding of grades. The result screenshot was not included in the materials sent, so the presentation does not invent a result.

What other improvements would you suggest for the grade section of JRU SWIT?

Question 13: Survey Result

Explanation/Result

This open-ended question collects other suggestions for improving the SWIT grade section. The written responses were not included in the materials sent, so they should be added if available.

Survey Summary

Key findings from the available questionnaire results

90%
wanted to know why they received a certain grade.

70%
have worried about a missing or unrecorded requirement.

90%
want SWIT to show individual scores.

DESIGN DIRECTION

The survey supports adding a Detailed Grade Breakdown that shows individual requirement scores, percentage/weight, missing or unrecorded requirements, and complete grade computation. This would give students more information before they need to ask a professor for clarification.
